

HISTORY OF BRG

Fatih Dogru (AKA F.D.), Founder of Burgu Metal, began his defense industry career as a production intern in 1996. F.D. had a chance to meet with Makina ve Kimya Endustrisi Kurumu (MKEK) a worldwide leading company in Defense Industry while his internship and he discovered his future goals right there. F.D. quit working as a deputy general manager for the company where he started as an intern after 17 years to fulfill his goals. F.D. founded Burgu Metal in 2013 with his Know-How and experiences of his 17 years career.

Burgu Metal has conducted many successful national defense projects with its young, dynamic and professional team under the leadership of F.D. since its foundation. Burgu Metal started the R&D projects to manufacture 9x19mm pistols, 5.56mmx45 AR15 rifles and such Military&Civil purpose products with its own brand called BRG in 2019. Burgu Metal manufactures parts and final products for Defense Industry such as 9mm pistols, 9mm MP5, 5.56mm AR-15 and 7.62mm rifles and grenade&tear gas launchers.

Burgu Metal is now building a state-of-the-art manufacturing facility located on a 10.000 m2 area to meet international defense market's needs. Burgu Metal continues its production and R&D projects aiming to build such modern manufacturing facilities in many other countries, particularly in USA.

BRG Mission

- to provide reliable, competitive, cooperative and high-quality services
- to meet the customer satisfaction
- to give innovative solutions with a state-of-the-art manufacturing for all its customers
- to be a leading company for the current and future needs of the defense industry

BRG Vision

- to become one of the top three most preferred world-wide brand in the defense industry by improving the quality and competitiveness.
- to increase the capacity to meet the current and future needs of defense industry.

BRG ETHICS & VALUES

Trust, Honesty, Transparency, Integrity, Confidentiality, Customer Orientation, Excellence, Responsibility, Sustainability, Respect, Justice, Ease of use!

BRG QUALITY

Burgu Metal always uses the state-of-the-art technology in its manufacturing processes and BRG Team always keep themselves up to date with the latest developments in the industry. Burgu Metal raise awareness of all BRG team-mates in this regard. With the principles of continuous development and self-renewal, BRG team aims to be a Worldwide Known Brand.

Burgu Metal Always Uses The State Of The Art Technology In Its Manufacturing Processes.

CODE: 26901

»» BRG9

Action	Semi-Auto/Single Action
Caliber	9x19 mm
Magazine	16+1
Barrel Length	4" – 103,6 mm
Length	7.36" – 187 mm
Height	5.67" – 144 mm
Width	1.33" – 33,65 mm
Weight Without Magazine	27.34 oz – 775g

»» FEATURES

- › Polymer Frame
- › Alloyed Steel Barrel and Slide
- › Rear and Front Sights with Dovetails
- › Loaded chamber indicators and Striker status indicator
- › Firing Pin Block, Trigger Safety and Grip Safety
- › 3 size changeable back straps
- › Picatinny rail

CODE: 26902

BRG9 pistols come with a plastic hard case, 2x (16+1) magazines, 3 size changeable back straps, a speed loader, a cleaning kit, and an user's manual.

223 / 5.56 Bolt Carrier Group, Nitride QPQ MPI

Since 2013, Burgu has also sold over 1 million bolt carrier groups under Turkish government contract for MPT55, MPT76, MP5, HK33, G3, and MG3

Magnetic particle inspected to ASTM E1444 aircraft quality inspection procedure for molecular soundness and longer life of the all the below-mentioned metal parts.

Carrier: 8620 heat treated (case hardened to SAE-AMS-6875). QPQ / nitride / melonite coated

Bolt: 14NiCr14 or 9310 Heat treated (case hardened to SAE-AMS-6875). QPQ / nitride / melonite coated

Extractors: Aircraft quality alloy steel shot peened. Heat treated to military drawing specification SAE-AMS-6875. Phosphated to 5.3.1.3 of MIL-STD-171.

Gas key: Gas key, aircraft quality steel heat treated to SAE-AMS-6875 QPQ HT PROCESS .

Cam pins: Precision machined. Heat treated to SAE-AMS-6875. Phosphated to 5.3.1.3 of MIL-STD-171

Firing Pin: Machined and precision ground for accuracy. Heat treated to military drawing specification per SAE-AMS-6875. Chrome lined per 1.2.2 of mil-std-171

Firing pin retaining pin: Heat treated stainless steel pin contouring the carrier body.

Ejector: Precision machined. Heat Treated to SAE-AMS-6875. Phosphated to 5.3.1.3 of MIL-STD-171.

Gas rings: 3 pc. stainless steel per Mil-Spec.
